

Ailectric

Overview of Products & Services

Introduction

As the top AI startup in Louisiana, Ailectric has the vision to create smarter industry:

- We bring artificial intelligence and apply machine learning to new domains;
- We develop novel deep learning technology to innovate manufacturing, diagnostics, safety, supply chains, commerce, cybersecurity, and healthcare; and
- We provide advanced analytics for sound, signals, image, video, and text.

Through a range of products and services spanning training, consulting, technology licensing, and novel product development, we can transform your business to maximize your success through the power of artificial intelligence and deep learning.

Training Services

We produce a variety of educational classes on artificial intelligence, deep learning, and data science that can be tailored to different audiences, including general overviews for managers and executives or more technical classes for developers and engineers.

Consulting Services

We provide expert consulting services focused on using artificial intelligence to meet your business goals, including the development of bespoke deep learning solutions, data science and analytics, and big data preparation and integration, as well as market analysis and focused sales lead generation.

Technology Licensing

We sublicense patent-pending technologies developed by the department of Computer Science & Engineering at Louisiana State University, one of the foremost AI labs in the country.

Technologies can be incorporated into custom solutions developed for your business. Solutions covered by licensed technologies include SpotCheck™ for non-invasive diagnostic testing of machinery, computer vision and video analysis, and root cause analysis of textual logs.

Products in Development

In addition to SpotCheck™ for non-invasive diagnostic testing of machinery, we are currently developing solutions related to video and image analytics, document analysis, smart supply chain management, and more.
