

Ailectric

Overview of Training Opportunities

Introduction

As the top AI startup in Louisiana, Ailectric has the vision to create smarter industry:

- We bring artificial intelligence and apply machine learning to new domains;
- We develop novel deep learning technology to innovate manufacturing, diagnostics, safety, supply chains, commerce, cybersecurity, and healthcare; and
- We provide advanced analytics for sound, signals, image, video, and text.

Through a range of products and services spanning training, consulting, technology licensing, and novel product development, we can transform your business to maximize your success through the power of artificial intelligence and deep learning.

Training Services

We produce a variety of educational classes on artificial intelligence, deep learning, and data science that can be tailored to different audiences, including general overviews for managers and executives or more technical classes for developers and engineers.

Training Tracks

Executives

A general overview of AI and how it fits into corporate strategy, with breakout sessions on strategic planning, technology roadmaps, and resource allocation to ensure maximum value.

Project Managers

How to plan out an AI project, including data gathering and evaluation, data cleanup and verification, development of a proof-of-concept model, integration into business processes, and delivery across the organization.

Developers

In-depth technical trainings, with focus on neural networks and deep learning, image and video analytics (CNNs), sound and text analytics (NLP), and bringing AI into existing applications.

Salespersons

A general overview of AI and how it can satisfy customer needs, value propositions for various products and services, and how to allay fears and promote the benefits of AI.

Contact
